OVERVIEW

The Beechcraft Bonanza is an American institution. Iconic in the arena of the Cessna 172, it was first introduced in 1947 and remains in production today with over 17,000 airframes rolling off the assembly line in Wichita.

A six-seater general aviation aircraft, the Bonanza is an all-around performer with solid aerodynamics and affordable economics. The 35-series model Bonanza was part of the original Bonanza lineup, in production from 1947-1982. It was one of the first all-metal airframes, entering the market when most aircraft were still constructed with wood.

The V35B is a late variant of the Model 35 Bonanza, representing the best iteration of the Model 35. 1,335 airframes of this variant were produced.

Beechcraft built thousands of Bonanza airframes, and the production line remains open today. This means a steady stream of parts, plenty of quality shops, and a vast community of owners that spans the globe.
