LH Engine

Logbook

SMOH | 77347

1995 - 2024

MSN: 500-0415

Prepared by the worldwide aviation specialists at RidgeAire, Inc.

JT15D Series Borescope Report

Customer: RidgeAire		Work Order #: N53RD	Order/Task: Engine BSI	Date: 3 June 2024	Tech: George Salazar
Model: JT15D-1A	Serial: LH PC-E77347	TSN: UNK	CSN: UNK	TSO: UNK	CSO: UNK

Engine Installation and Condition on Arrival:

Engine SN PC-E77347 is installed in #1 position of Citation 500, N53RD, SN 500-415. Engine is in service.

INSPECTION POINT:	FINDINGS:
Inlet and Fan:	Dirty, no discrepancies noted at this time
Boost Rotor:	N/A
Stator Vane:	N/A
Inlet and Impeller:	Coating loss on inlet
Diffuser Tubes:	No discrepancies noted at this time
Deflector Segments/Ring:	N/A
Combustion Liner:	No discrepancies noted at this time
Small Exit Duct:	Minor erosion
HT Stator:	No discrepancies noted at this time
HT Blades:	1 each Airfoil has a Leading Edge Blister, No action Req'd at this time.
HT Segments:	Evidence of rub
1 st Stage LT Blades:	No discrepancies noted at this time
2 nd Stage LT Blades:	No discrepancies noted at this time
#4 Bearing Housing:	No discrepancies noted at this time

GENERAL INSPECTION:	FINDINGS:
Engine Installation:	Normal
State of Preservation:	N/A

Date: 11/27/2019

Squawk

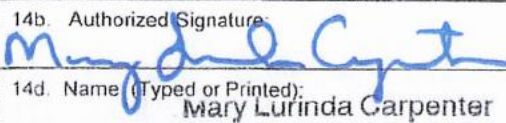

- 1.1 COMPLIED WITH INCOMING PERFORMANCE RUN AS REQUIRED IAW CESSNA 500 AMM AND P&W JT15D-1 EMM.
- 1.2 COMPLIED WITH PRISM CHECK OF COCKPIT ACRYLIC WINDOW WITH SATISFACTORY RESULTS IAW CESSNA 500 SERIES MM 56.
- 1.3 PERFORMED AVIONICS FUNCTIONAL CHECKS PER AC43.13-1B, CH 12 AND MFG MM, DISCREPANCIES NOTED AND GIVEN TO CUSTOMER
- 1.4 COMPLIED WITH BORESCOPE INSPECTION OF LEFT AND RIGHT ENGINES AS REQUIRED IAW P&W JT15D-1 EMM.
- 1.5 TOPPED OFF AIRCRAFT AND CHECKED FOR FUEL LEAKS, ALL CHECKED GOOD AT THIS TIME, ALL WORK ACCOMPLISHED IAW CESSNA 500 SERIES MM, CH 12 AND 28.
- 1.6 COMPLIED WITH IN-FLIGHT PRESSURIZATION CHECK ON CHECK FLIGHT OF AIRCRAFT, FLEW AIRCRAFT UP TO FL250, ALL CHECKS GOOD AT THIS TIME, ALL WORK ACCOMPLISHED IAW STANDARD PRACTICES AND AIRCRAFT FLIGHT MANUAL.
- 1.7 TESTED, TROUBLESHOT, REMOVED PILOTS RMI AND BENCH CHECKED, UNIT CHECKED GOOD, FOUND RMI INDICATOR NOT RECEIVING 28VDC, LOCATED BLOWN FUSE IN RIGHT SIDEWALL, REPLACED FUSE, OPERATIONAL CHECKED GOOD, ALL WORK ACCOMPLISHED IAW COLLINS RMI-30 MM.
- 1.8 CONFIRMED ELECTROLUMINESCENCE LIGHTS ON CENTER PEDESTAL INOPERATIVE, TROUBLESHOT, REMOVED AND REPLACED DEFECTIVE E.L. LIGHTING INVERTER WITH OVERHAULED EXCHANGE UNIT P/N EM2044-1EX, OPERATIONAL CHECKED GOOD, ALL WORK ACCOMPLISHED IAW CESSNA WIRING PRINTS, CH33-10-06.

All Work Performed I.A.W. Cessna 500 Appropriate Data.

These items identified above were repaired and/or inspected in accordance with current Federal Aviation Regulations and the repairs are approved for return to service. Pertinent details of these repairs are on file at the repair station under Work Order Number JET7967.

User/Installer Responsibilities						
It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

To avoid late fees and/or outright billing of replacement cost, all core units must be returned to us within 15 days of receipt. The core must be a like part number unless otherwise stated in writing. It must have a legible data tag with part number and serial number on it or it may be rejected. Excessive overhaul charges on your core unit plus any additional freight charges incurred will be billed as they become available. This may take up to 90 days from the receipt of your core or we will notify you otherwise.		
March Aviation does not pay for return shipping, duty or taxes on cores, nor do we accept COD shipments. March Aviation will not be held responsible for lost, misdirected, or refused shipments.		
Total: [USD]		\$ 0.00

<u>06</u>	<u>01</u>

72-00-00

Table 601 Periodic Inspection

COMPONENT	NATURE OF INSPECTION	INSPECTION INTERVAL	
		DAILY/PREFLIGHT	MINOR
ENGINE EXTERNALS			LT RT
Tubing, Wiring, Control Linkage and Cables	Security of all accessible connections, clamps and brackets.		X RIR RIR
	Evidence of wear, chafing, cracks and corrosion.		X RIR RIR
	Evidence of fuel or oil leaks.		RIR RIR
	Evidence of fraying, broken strands, security of cables and fittings.		X RIR RIR
	Lubricate rod end connectors.		RIR RIR
Engine Mounts	Security and condition		RIR RIR
Compressor Inlet	Check compressor inlet area for cleanliness.	X	X RIR RIR
	Check low pressure compressor blades and stator vanes for dirt deposits, corrosion and erosion.	X	X RIR
	Pre-SB7268/Pre-SB7300 JT15D-4, -4B and -4D engines: inspect LP compressor case inner diameter for evidence of fan blade rub revealing parent metal. In the event of rub, inspect rubbed area for cracks using fluorescent dye penetrant. Repeat inspection every 100 hours. Reject any case exhibiting cracks. Incorporate Pre-SB7300 on replacement case.		X N/A N/A
	Post-SB7268/ Post-SB7300 JT15D-4, -4B and -4D engines: inspect silicone damping ring for damage and position.		X N/A N/A
	JT15D-4, -4B and -4D engines not incorporating SB7264 or SB7369: inspect LP compressor bypass stator retaining rivets around circumference of LP compressor case. Ensure that all rivets are present and secure.	Every 300 hours	N/A N/A
Outer Bypass Duct	Check all bosses and brackets for evidence of bond separation (Ref. 72-70-03)		X RIR RIR
Exhaust Duct	Cracks or distortion.		RIR RIR
	Pre-SB7013 JT15D-1 and -1A engines: every 100 hours inspect 21 bolts (not lockwired) securing inner rear bypass duct to turbine exhaust duct.		X N/A N/A

COMPONENT	NATURE OF INSPECTION	INSPECTION INTERVAL	
		DAILY/PREFLIGHT	MINOR
	Loosen bolts, then retorque to 32 to 36 lb.in. Replace and torque all missing bolts.		LT RT
No.4 Bearing Housing	Security of installation		X RIR RIR
	On Pre-SB7193 configuration: use a borescope to inspect No.4 bearing housing for security of retaining bolts and slab nuts. No borescope inspection is required on Post-SB7193 engines. Apply anti-galling compound (PWC06-032A) to threads of borescope plug port and install. Torque 25 to 35 lb.in. and lockwire. Do not exceed the torque value stated.		X RIR RIR
	Integrity of lockwire		RIR RIR
Accessories	Security of accessories		RIR RIR
Gas Generator Case - JT15D-4, -4B, -4D only: Pre-SB7240 engines with P/N 3020200, 3029241, 3029066 or 3106469-01 gas generator case (Ref. SB7217)	In-situ inspection using a borescope (Ref. 72-30-05). Inspect circumferential stitch weld: (1) Forward of bolts securing gas generator case deflector strips. (2) Welds forward and aft of stitch weld. (3) Longitudinal welds from containment to rear flange for cracks (Ref. Fig. 601). Viewed through a borescope, early distress of the case will be indicated as a black line, similar to a soft pencil line, and running alongside and adjacent to the welds. Suspect crack indication should be confirmed, ie. dye penetrant-inspected. Confirmed cracks in case are cause for removal; engine should be returned to an approved overhaul facility for repair.	Every 300 ± 50 hours	N/A N/A
Gas Generator Case - JT15D-4B only: Pre-SB7240 engines with P/N 3106469-01 gas generator case (Ref. SB7216)	In-situ inspection using a borescope (Ref. 72-30-05). Inspect gas generator case outer surface, paying particular attention to the following areas (Ref. Fig. 602): (a) Circumferential spot welds forward of the deflector retention bolt circle (Detail A). (b) Circumferential fusion welds (2) forward and aft of spot welds. (c) Longitudinal welds (1) along containment ring, and from containment ring to gas generator case rear flange. If a crack is detected, remove engine and send it to an approved overhaul facility for repair.	Every 150 hours	N/A N/A
HP Turbine Assembly: In-situ Inspection			
All JT15D-1, -1A, -1B and -4 engines not incorporating SB7297 or SB7317	Borescope inspection (see NOTES)	Initial inspection within 300 hours. Repeat inspection at intervals not to exceed 300 hours	RIR RIR
All JT15D-4B engines not	Borescope inspection (see NOTES)	Initial inspection within 300 hours TSN, 300 hours TSHSI,	N/A N/A

COMPONENT	NATURE OF INSPECTION	INSPECTION INTERVAL	
		DAILY/PREFLIGHT	MINOR
incorporating : SB7296 together with SB7297 or SB7317 or , SB7307 together with SB7297 or SB7317		300 hours TSO or 300 hours Time since previous inspection for HP turbine blade shift. Repeat inspection at intervals not to exceed 300 hours. N/A	
All JT15D-4D engines not incorporating: SB7296 together with SB7297 or SB7317 or, SB7307 together with SB7297 or SB7317	Borescope inspection (see NOTES)	Initial inspection within 25 hours. Repeat inspection at intervals not to exceed 300 hours N/A	
	NOTE: 1. Inspect HP turbine blades for evidence of blade shift using a 3 mm or a 4 mm flexible borescope. Blade forward movement in excess of 0.020 inch is reason for removal of the HP turbine for repair (Ref. 72-50-02).		
	NOTE: 2. Inspection with a 5 mm or a 6 mm flexible borescope has proven extremely difficult and is no longer recommended.		
	NOTE: 3. Borescope access is achieved by passing the borescope probe between the blades of the LP turbine assembly. With the borescope in position, rotation of the HP rotor via the AGB starter generator driveshaft allows all HP turbine blades to be inspected. The extent of blade shift may be assessed by comparing with the HP turbine blade serration-to-serration pitch, which is 0.090 inch.		
Automatic Fuel Shutoff Mechanism (Post- SB7281 /Pre- SB7306 only)	Using a borescope, inspect emergency fuel shutoff linkage to ensure security:		X N/A
	Borescope-inspect overspeed control shutoff linkage through the inspection port in exhaust duct cone. Verify cotterpin through D-headed bolt and castellated nut are intact. Castellated nut should be tight against the No. 4 bearing housing cover assembly.		X N/A
	Borescope-inspect overspeed control shutoff linkage through cut-out in rear inner bypass duct adjacent to shutoff valve. Access through back end of engine. Verify cotterpin through D-headed bolt and castellated		X N/A

COMPONENT	NATURE OF INSPECTION	INSPECTION INTERVAL	
		DAILY/PREFLIGHT	MINOR
	nut are intact. Castellated nut should be tight against the overspeed control bracket assembly.		
	Incorporate SB7306 before next flight if cotterpin is missing or security of linkage assembly appears compromised.		X N/A
	Apply anti-galling compound (PWC06-032A) to threads of borescope port plug and install plug in exhaust duct. Torque plug 25 to 35 lb.in. and lockwire. Do not exceed torque value stated.		
Overspeed Control Wire Rope (Pre-SB7288)	Using a borescope, inspect overspeed control wire rope clevis and ball end-to-cable joints for security:		X N/A
	Borescope-inspect clevis-to-wire rope joint through borescope inspection port in exhaust duct cone. Check for broken cable strands at joint.		
	Borescope -inspect ball end-to-wire rope joint through cut-out in rear inner bypass duct adjacent to emergency fuel shutoff valve. This area is accessible through the back end of the engine. Check for broken cable strands at the joint.		X N/A
	Incorporate SB7288 before next flight if any broken cable strands are found.		X N/A
	Apply anti-galling compound (PWC06-032A) to threads of borescope port plug and install plug in exhaust duct. Torque plug 25 to 35 lb.in. and lockwire. Do not exceed torque value stated.		
SYSTEMS			
Oil System	CAUTION: : DO NOT MIX DIFFERENT BRANDS OR TYPES OF OIL WHEN CHANGING OIL OR WHEN REPLENISHING OIL BETWEEN OIL CHANGES (REF. SB7001).

**AUTHORIZED RELEASE CERTIFICATE
APPROVAL TAG
USER/INSTALLER RESPONSIBILITIES**

It is important to understand that the existence of this document alone does not automatically constitute authority to install the part/component/assembly.

Where the user/installer works in accordance with the national regulations of an Airworthiness Authority different than the Airworthiness Authority of the country specified in block 1 it is essential that the user/installer ensures that his/her Airworthiness Authority accepts parts/components/assemblies from the Airworthiness Authority of the country specified in block 1.

Statements 14 and 15 do not constitute installation certification. In all cases the aircraft maintenance record must contain an installation certification issued in accordance with the national regulation by the user/installer before the aircraft may be flown.

**BON DE SORTIE AUTORISÉE
ÉTIQUETTE D'AGRÉEMENT
RESPONSABILITÉS DE L'USAGER/MONTEUR**

Il est important de bien comprendre que de par son existence ce document ne constitue pas forcément l'autorisation d'installer la pièce/composant/ensemble.

Lorsque l'utilisateur/monteur (euse) travaille conformément aux règlements nationaux d'une autorité de navigabilité, autre que l'autorité de navigabilité inscrite à la case 1, il est essentiel que l'utilisateur/monteur (euse) s'assure que son autorité de navigabilité accepte les pièces/composants/ensembles de l'autorité de navigabilité inscrite à la case 1.

Les déclarations apparaissant aux cases 14 et 15 ne constituent pas une certification de montage. En tout temps le dossier de maintenance de l'aéronef doit contenir une certification de montage émise selon les règlements nationaux, par l'utilisateur/monteur (euse), avant que l'aéronef puisse décoller.

USER/INSTALLER RESPONSIBILITIES

It is important to understand that the existence of this Document alone does not automatically constitute authority to install the part/component/assembly.

Where the user/installer work in accordance with the national regulations of an Airworthiness Authority different that the Airworthiness Authority of the country specified in Block 1 it is essential that the user/installer ensures that his/her Airworthiness Authority accepts parts/components/assemblies from the Airworthiness Authority of the country specified in block 1.

Statements in block 14 and 19 do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

The FAA Form 8130-3 and JAA Form One are equivalent. Other countries such as Canada also have equivalent acceptable documents.

TSN 3491.3

77 3491.3

1/ Reason for Return:

77 3491.3

Overhaul, time expired.

2/ Condition/Rectification:

The engine was disassembled and inspected as required by the reason for removal and in accordance with P&WC Aircraft Services, Inc. policies, manufacturer's specifications and customer specifications. The following is a summary of the conditions observed during and after teardown. Part numbers are listed for easy cross-reference with the Illustrated Parts Catalog when major parts were repaired, replaced, or exchanged. Exchanges occur when extensive reworks are required which would delay the build of your engine. Please note that this report does not detail minor items reworked or replaced because of wear, implementation of certain Service Bulletins, installation of overhaul kits, refurbishment of protective surface treatments or components found serviceable "as is" at Detail Inspection.

3/ Modifications Embodied This Visit:

SB 7002, 7165, 7172, 7181, 7183, 7192, 7197, 7199, 7203, 7206, 7215, 7229, 7259, 7288, 7292, 7306, 7307, 7309, 7310, 7317, 7318, 7321, 7322, 7328, 7329, 7337, 7347, 7376, 7384, 7392, 7399, 7408, 7432, 7438

140	Low Compressor Blades P/N 3019801 Qty. 23	Reworked	Blended minor impact damage on leading edges.
270	Low Compressor Shaft P/N 3028791	Reworked	Restored protective coating.
290	Gearshaft Assy. P/N 3020954	Unserviceable	Gear teeth damaged.
70	No. 1. Brg. Hsg. P/N 3031403	Reworked	Restored protective coating.

Comments:

Other components required rework or replacement to incorporate Service Bulletins.
Remaining components found serviceable.

GAS GENERATOR SECTION

40	Impeller Hsg. P/N 3020366	Reworked	Restored protective coating.
60	Gas Gen. Case P/N 3029066	Reworked	Blended apex entries. Restored protective coating. Pressure checked oil lines. Regapped diffuser pipes.
100	Bevel Gear, G/B Drive P/N 3020690	Unserviceable	Spalling on gear teeth.
230	High Turbine Shaft P/N 3031584	Unserviceable	Excessive corrosion pitting on splines.
250	High Compressor Shaft P/N 3031585	Reworked	Restored protective coating.
350	No. 3 1/2 Brg. Rear Air Seal P/N 3029070	Unserviceable	Rubbed oversize.
410	No. 3 Brg. Rear Air Seal P/N 3029071	Unserviceable	Rubbed over acceptable limit.
440	No. 3 Brg. Front Air Seal P/N 3019674	Unserviceable	Rubbed beyond acceptable limit.
10	LT Stator Support P/N 3023708	Reworked	Weld repair cracks.
30	Combustion Chamber Liner P/N 3030317	Reworked	Replaced one worn fuel nozzle boss.
40	HT Stator Support Shroud P/N 3031058	Reworked	Repaired wear in sealing ring groove.
50	HT Shroud Segments P/N 3030835 (Qty. 15)	Unserviceable	Burned and eroded.
140	HT Stator P/N 3024961	Exchanged	Weld repair cracks. Restored sealing faces.
150	Small Exit Duct P/N 3031463	Reworked	Restore sealing faces. Regapped heatshield.
170	Sealing Ring P/N 3030845	Reworked	Repaired worn slots. Repaired seal face.
200	Large Exit Duct P/N 3100294-01	Reworked	Replaced worn locking table.
60	High Turbine Blades P/N 3028601	Unserviceable	(Qty. 71) Insufficient time remaining.

Comments:

Other components required rework or replacement to incorporate Service Bulletins.

Remaining components found serviceable.

ACCESSORY GEARBOX

110	Seal, Face Type P/N 3012579	Unserviceable	Seal face chipped.
210	Main Shaft Assy. P/N 3019634	Reworked	Lapped carbon seal mating face.
160	Oil Pressure Pump Element P/N 3027294	Unserviceable	Worn beyond serviceable limit.
1	AGB Hsg. P/N 3023481	Reworked	Restored protective coating.
1	AGB Cover P/N 3017246	Reworked	Replaced worn plain bearings. Restored protective coating.

Comments:

Other components required rework or replacement to incorporate Service Bulletins.

Remaining components found serviceable.

LOW TURBINE AND EXHAUST

121	Low Turbine Shaft P/N 3024931	Reworked	Restored protective coating.
220	Intershaft Tube Assy. P/N 3028778	Reworked	Cold worked to restore run-out. Replaced damaged oil nozzle.
50	3rd Stg. LT Blades P/N 3020703 Qty. 1	Unserviceable	Damaged beyond serviceable limit.
1	3rd Stg. PT Stator P/N 3021663	Reworked	Replaced worn air seals. Lapped sealing face.
50	2nd Stg. LT Blades P/N 3022202 Qty. 4	Unserviceable	Heavy impact damage (Qty 3). Shroud tip bent (Qty. 1).
80	Interstage Air Seal P/N 3022116	Reworked	Repaired worn sealing diameter.
1E	2nd Stg LP Turbine Stator P/N 3034062	Reworked	Plasma repaired sealing face. Replaced worn air seals.
100	Exhaust Duct P/N 3028966	Reworked	Repaired wear on diameter "C".
295	No. 4 Brg. Carbon Seal P/N 3028782	Unserviceable	Sealing face chipped.

Comments:

Other components required rework or replacement to incorporate Service Bulletins.

Remaining components found serviceable.

BY-PASS DUCTS & ENGINE MOUNTS

10	Front By-pass Duct Assy. P/N 3020330	Reworked	Restored protective coating. Weld repaired cracks.
10	Rear By-pass Duct Assy. P/N 3021436	Reworked	Restored protective coating.
12	By-pass Duct Assy. P/N 3029698	Reworked	Restored protective coating.
100	Engine Rear Mount Assy. P/N 3021047	Reworked	Restored protective coating.
170	Rear Mount Bracket P/N 3021996	Reworked	Replaced worn bearings.

Comments:

Other components required rework or replacement to incorporate Service Bulletins.
Remaining components found serviceable.

EXTERNALS AND ACCESSORIES

The externals and accessories unless otherwise noted, were overhauled, modified (where applicable) and tested. Some items may have been exchanged to expedite build.

Oil Filer Element
P/N 3036376

(Qty. 1) Unserviceable
Failed bubble test.

Ignition Cable
P/N 3107371-02

(Qty. 1) Unserviceable
Damaged beyond repairable limit.
